Application/Control Number: 09/780,431

Art Unit: 2834

#### **DETAILED ACTION**

#### Response to Arguments

1. Applicant's arguments with respect to claims 1-7 and 13 have been considered but are most in view of the new ground(s) of rejection.

#### Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in-
- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).
- 3. Claims 1-7 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Sunaga et al. (6,297,572).

The applied reference has a common inventor with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Application/Control Number: 09/780,431

Art Unit: 2834

Regarding claim 1, Sunaga et al. show the circuit protection case (20) formed of plastic and including a partition wall (28) which partitions the interior of the circuit protection case into a first chamber (left) containing the switching elements (41) and second chamber (right) containing the control circuit (33).

Regarding claim 13, because the partition wall (28) is made of plastic, it inherently inhibits heat generated in the first chamber from passing to the second chamber and vice versa.

It is noted that claims 2-7 depend on claim 1.

#### Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Art Unit: 2834

## Allowable Subject Matter

5. Claims 8-12 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter: the record of prior art does not show a brushless motor comprising terminal pins extending from the coils of the stator and connecting bus bars held by an inner case installed in the circuit protection case, each connecting bus bar having one end welded to a given part of the control section of the drive circuit and the other end welded to corresponding one of the terminal pins as shown in claim 8.

## Information on How to Contact USPTO

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dang D Le whose telephone number is (703) 305-0156. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nestor Ramirez can be reached on (703) 308-1371. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7382 for regular communications and (703) 308-7382 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1782.
